

January 16, 1956

Gentlemen:

The following quotation is submitted regarding the design and fabrication of one special camera and for four (4) interchangeable magazines of capacities ranging from 200 to 1000 feet by standard increments in accordance with a proposal already submitted by these laboratories.

This quotation includes all costs of such engineering and fabrication but does not include the cost of lenses and aperture control apparatus.

Total..... \$68,643.00

The seven lenses with corresponding filters required for this task represent an additional cost of \$3,500.00.

The cost of providing the above lenses with automatic aperture control is difficult to estimate at the present time. We should like to
